

Funding Proposal

Andolo Gideon Youths (AGY)

Project Title: Poultry Empowerment Initiative (PEI)

Submitted by: Andolo Community Development Initiative (ACDI)

1. Executive Summary

The Langatta (Andolo) Poultry Empowerment Initiative (LAPEI) is a community-led project designed to tackle chronic unemployment in the Langatta and Andolo areas of Nairobi County. With unemployment rates exceeding 40% among youth and women, the community faces economic hardship, social instability, and a lack of sustainable livelihoods. This proposal seeks **KSh 6,500,000** to establish a scalable poultry farming model that directly creates jobs, builds entrepreneurial skills, and links beneficiaries to Nairobi's high-demand poultry market.

By leveraging the consistent demand for both indigenous and broiler chicken in Nairobi's hotels, residential estates, and open-air markets, the project will directly create **50 sustainable jobs** and support **200 indirect beneficiaries** through out-grower schemes and value-chain linkages. The initiative combines hands-on training, provision of quality starter kits, and robust market linkages, transforming unemployed individuals into profitable agripreneurs. Expected outcomes include a measurable reduction in local unemployment, improved household nutrition, and the formation of a self-sustaining poultry cooperative that ensures long-term economic resilience.

2. Introduction and Problem Statement

The Unemployment Crisis in Langatta (Andolo), Nairobi

Langatta and the adjacent Andolo area, though located within Nairobi County, remain peri-urban communities where formal employment is scarce. Most residents depend on casual labour, small-scale trade, or subsistence activities, which do not provide stable income. The situation is particularly acute among:

- **Youth (18–35 years):** Many are idle or underemployed, lacking the capital and skills to start viable enterprises.
- **Women:** Female-headed households often struggle to meet basic needs due to limited income-generating opportunities.

- **Families:** Without steady earnings, households face difficulty paying school fees, accessing healthcare, and affording nutritious food.

This chronic unemployment fuels rural-to-urban migration within Nairobi, often leading to overcrowding in informal settlements and exposing youth to risky livelihoods.

Why Poultry Farming?

Poultry farming offers a practical and sustainable solution for Langatta (Andolo) for several reasons:

1. **Low Entry Barrier & Quick Returns:** Poultry requires little land, modest start-up capital, and offers rapid turnover (6–8 weeks for broilers), making it ideal for resource-constrained households.
2. **Proximity to a Large Market:** Being in Nairobi provides direct access to a massive and diverse market – including hotels, fast-food outlets, supermarkets, and residential consumers – that consistently demands high-quality chicken and eggs.
3. **Climate Suitability:** Nairobi’s moderate climate is well-suited for poultry rearing, with fewer extreme weather risks than other regions.
4. **Existing Interest:** Many community members already keep small flocks informally, demonstrating a willingness to engage in poultry farming if supported with training, quality inputs, and market access.

3. Project Description

Vision and Mission

- **Vision:** A prosperous, self-reliant community in Langatta (Andolo) where unemployment is eliminated through sustainable agribusiness.
- **Mission:** To empower unemployed youth and women with the skills, resources, and market connections necessary to build profitable and resilient poultry enterprises.

Objectives (SMART)

1. **Job Creation:** Directly create 50 full-time equivalent jobs for unemployed youth and women within 18 months.
2. **Training:** Train 100 individuals (50 primary beneficiaries and 50 out-growers) in modern poultry management, business planning, and financial literacy.
3. **Production Increase:** Increase local poultry production by 150% within two years – from an estimated 600 birds per month to 1,500 birds per month.

4. **Food Security:** Improve dietary diversity for 100 households by increasing their access to affordable animal protein (eggs and meat).
5. **Income Increase:** Raise the average monthly income of beneficiary households by at least 50% within the first year of operation.

Target Beneficiaries

The primary beneficiaries will be **unemployed youth (18–35)** and **women** residing in Langatta and Andolo. Selection criteria will prioritise:

- Demonstrated interest in poultry or agriculture.
- Landless or land-poor individuals (who can use small backyard spaces or communal rearing areas).
- Female-headed households and youth from vulnerable backgrounds.

Secondary beneficiaries include local feed suppliers, veterinary service providers, and the broader community through increased availability of poultry products and local economic activity.

Activities and Methodology

Phase 1: Recruitment and Training (Months 1–3)

- **Community Mobilisation:** Hold barazas (community meetings) and engage local leaders to explain the project and identify potential beneficiaries.
- **Selection:** A committee of community elders and project staff will select 50 primary beneficiaries based on commitment, need, and available space.
- **Training Programme:** Conduct a 2-week intensive training covering:
 - Modern poultry housing (low-cost designs suitable for peri-urban settings).
 - Biosecurity and disease prevention.
 - Brooding, feeding, and flock management.
 - Business management, record-keeping, and financial literacy.
 - Cooperative formation and governance.

Phase 2: Infrastructure & Starter Kits (Months 3–5)

- **Starter Kits:** Each beneficiary receives a kit containing: 50 high-quality chicks (mix of indigenous and broilers), 10 bags of starter feed, vaccines, vitamins, and essential equipment (drinkers, feeders).

- **Housing Support:** Provide iron sheets, wire mesh, and treated timber to help beneficiaries construct improved, bio-secure poultry houses on their premises or on designated communal land.

Phase 3: Production & Technical Support (Months 5–18)

- **Mentorship:** Assign each beneficiary a mentor (experienced farmer or project officer) who conducts bi-weekly farm visits.
- **Veterinary Services:** Partner with a local veterinary officer for regular vaccination campaigns and on-call health support.
- **Input Supply Hub:** Establish a revolving fund for bulk purchase of feed and medicine, reducing costs for beneficiaries.

Phase 4: Market Linkage & Value Addition (Months 10–24)

- **Cooperative Formation:** Assist beneficiaries to register the Langatta Poultry Farmers Cooperative, which will aggregate birds and eggs for collective bargaining and sales.
- **Market Linkages:** Develop contracts with hotels, restaurants, schools, and retail outlets in Nairobi (e.g., in Eastlands, Nairobi CBD, and nearby markets).
- **Value Addition:** Train beneficiaries in simple processing (slaughtering, packaging, freezing) to access higher-value markets and reduce post-harvest losses.

4. Organizational Capacity

[Name of Implementing Organization] is a registered community-based organisation (CBO) with a three-year track record in Langatta, Nairobi. Our mission is to reduce poverty through sustainable agriculture and enterprise development.

Relevant Experience:

- **2024–2025:** Implemented a “Nutrition and Kitchen Gardens” project, training 120 women in urban vegetable production and dietary diversification.
- **2025:** Coordinated a small-scale poultry vaccination drive in Langatta, reaching over 1,500 birds and raising awareness on biosecurity.

Key Personnel:

- **Project Lead, John Otieno:** A resident of Langatta with 10 years of experience in community development. Holds a degree in Agriculture and Enterprise Development from the University of Nairobi.
- **Technical Advisor, Dr. Mary Wanjiku:** Licensed veterinarian with 8 years of experience in urban poultry health and husbandry, based in Nairobi.

- **Finance & Admin Officer, Jane Muthoni:** CPA holder with 5 years of experience managing donor-funded community projects.

5. Budget and Financial Projections

Detailed Budget (Total Funding Request: KSh 6,500,000)

Category	Item Description	Unit Cost (KSh)	Quantity	Total (KSh)	Justification
Capital Expenditure				1,800,000	
	Poultry Housing Materials (iron sheets, mesh, timber)	25,000	50 units	1,250,000	For 50 beneficiary units (basic, improved housing).
	Equipment (drinkers, feeders, heat lamps)	11,000	50 units	550,000	Essential equipment per unit.
Operational Costs				3,600,000	
	Starter Kits (50 chicks, feed, vaccines)	40,000	50 kits	2,000,000	Core productive assets for beneficiaries.

Category	Item Description	Unit Cost (KSh)	Quantity	Total (KSh)	Justification
	Training & Materials	500,000	1 program	500,000	Venue, facilitators, training manuals.
	Veterinary Services & Medicine	300,000	18 months	300,000	Regular vaccinations, emergency care.
	Transport & Logistics	400,000	18 months	400,000	Input delivery, market linkage trips.
	Monitoring & Evaluation	400,000	18 months	400,000	Data collection, field visits, impact assessment.
	Personnel			900,000	
	Project Coordinator (part-time)	50,000	18 months	900,000	Oversight, reporting, stakeholder engagement.
Contingency				200,000	
	Unforeseen Expenses	200,000	1	200,000	3% of total for price fluctuations/emergencies.

Category	Item Description	Unit Cost (KSh)	Quantity	Total (KSh)	Justification
TOTAL				6,500,000	

Financial Sustainability Plan

The project is designed to become self-sustaining beyond the initial funding period through:

1. **Cooperative Revenue:** The Langatta Poultry Farmers Cooperative will charge a modest membership fee and a 2% commission on bulk sales. These funds will cover the cooperative's operating costs.
2. **Revolving Fund:** The bulk-purchased feed and medicine will be sold to members at a 5% markup above cost price. Profits will be reinvested into a revolving fund that provides low-interest loans to members for expansion.
3. **Out-grower Model:** After the first cycle, successful farmers will "pay it forward" by supplying chicks and mentorship to secondary beneficiaries (the 50 out-growers), expanding the programme without additional donor capital.

Expected Return on Investment (ROI)

- **For Beneficiaries:** Each farmer is projected to sell at least 50 birds per cycle (six cycles over 18 months). At an average net profit of KSh 500 per bird, a beneficiary can earn **KSh 150,000** over the project period – a significant income boost for participating households.
- **For the Community:** The project will inject an estimated **KSh 7.5 million** into the local economy over two years through salaries, input purchases, and direct farmer income, creating a multiplier effect.

6. Monitoring, Evaluation, and Reporting

Key Performance Indicators (KPIs)

Indicator	Baseline	Target (Year 1)	Target (Year 2)	Means of Verification
Number of direct jobs created	0	25	50	Payroll / cooperative member register
Number of people trained	0	100	0	Training attendance sheets
Average monthly income of beneficiaries	KSh 4,000	KSh 6,000	KSh 8,000	Financial records, farmer interviews
Number of birds sold per month	600	1,000	1,500	Cooperative sales records
Survival rate of chicks	N/A	80%	85%	Farm inspection reports

Data Collection and Analysis

- **Daily Records:** Farmers maintain simple record books for feed use, mortality, and sales.
- **Field Visits:** Project staff conduct bi-weekly monitoring visits to 10% of farms to verify records and provide on-site support.
- **Quarterly Surveys:** Structured surveys with all beneficiaries track income, production, and challenges.
- **End-of-Project Evaluation:** An independent external evaluation will assess overall impact, sustainability, and lessons learned.

Reporting Schedule

- **Quarterly Progress Reports:** Submitted to the donor detailing activities, achievements, challenges, and financial expenditure against the budget.
- **Annual Financial Audit:** An independent audit of project finances will be conducted at the end of each fiscal year.
- **Final Narrative & Financial Report:** A comprehensive report will be submitted within 60 days of project completion.

7. Appendices (Optional)

(To be attached in a full submission)

- **Appendix A:** Letters of support from the local Chief's office and community leaders in Langatta.
- **Appendix B:** Resumes of key personnel (John Otieno, Dr. Mary Wanjiku, Jane Muthoni).
- **Appendix C:** Market assessment summary – a survey of 25 hotels and eateries in Eastlands and the Nairobi CBD indicating a combined demand of over 500 birds per week.
- **Appendix D:** Photographs of the proposed demonstration site and recent community meetings.

Conclusion

The Langatta (Andolo Gideon Youth) Poultry Empowerment Initiative offers a practical, scalable solution to unemployment in a peri-urban area of Nairobi. By investing in skills, inputs, and market access, this project will equip unemployed youth and women with the tools to build sustainable livelihoods. We respectfully request your partnership to make this vision a reality for the people of Langatta and Andolo.
